ABC Construction**13.11.2025****Blind Spots****How to interpret the Blind Spots?**

Blind Spots measure the difference between one's self-perception and the perceptions of others against a measured competency or group of competencies. Positive Blind Spot scores indicate the self-perception scores are higher than the scores of other assessors.

The colour indicates the size of the Blind Spot:

■ **RED:** Indicates a big difference between the self-assessment score and the score given by the other assessors. The scoring difference is greater than 50% of the scale (+ or -).

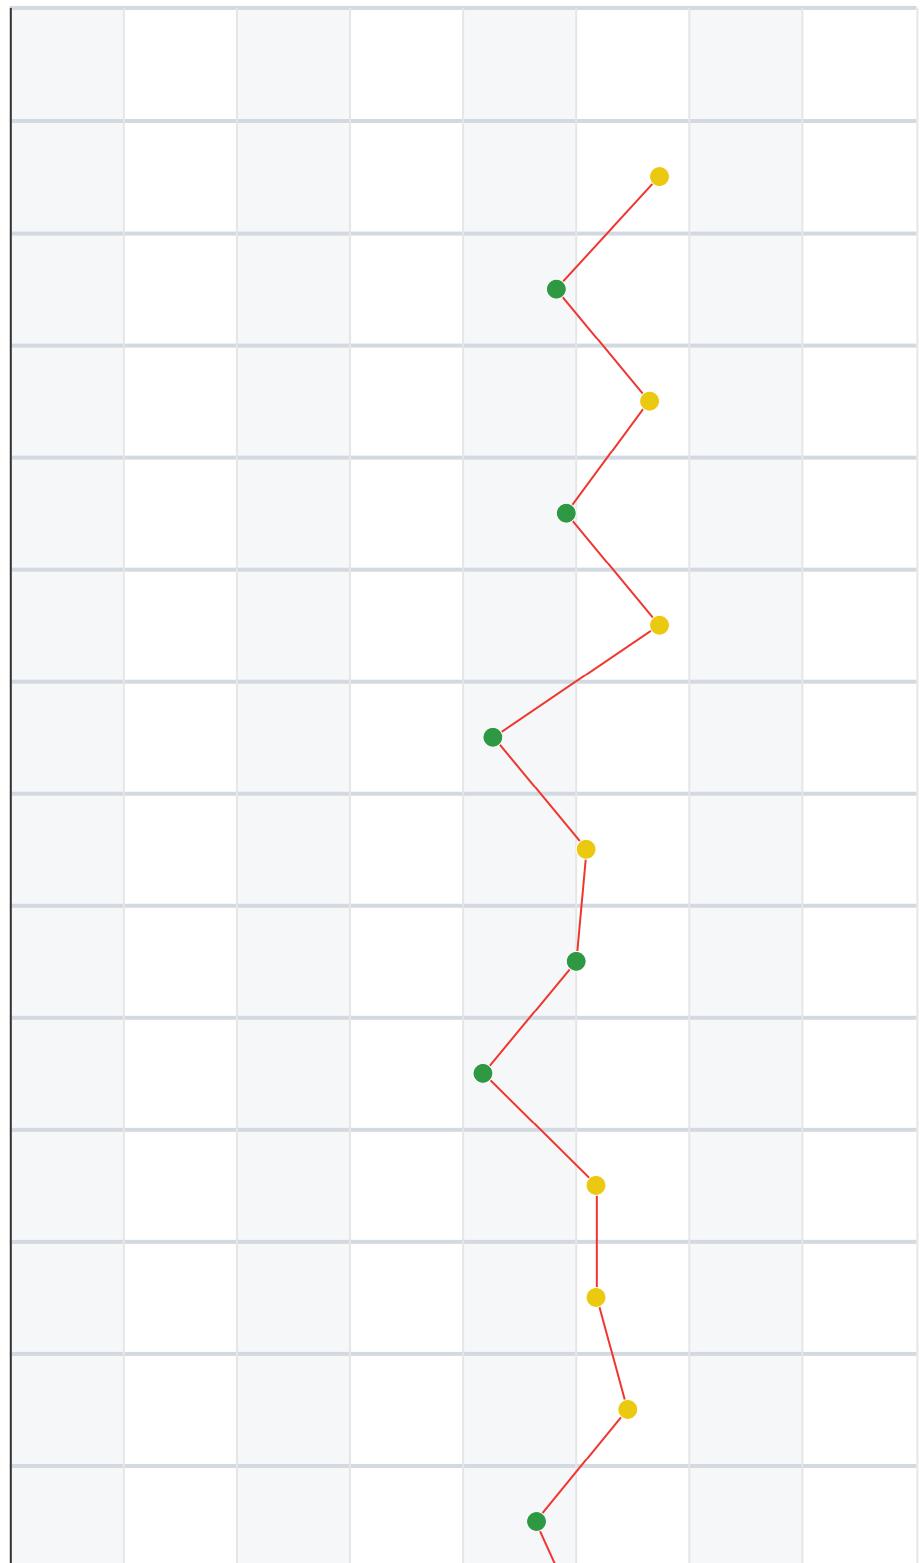

■ **YELLOW:** Indicates there is a moderate difference between the self-assessment scores and that of the assessors. The scoring difference is greater than 25% of the scale (+ or -).

■ **GREEN:** Indicates scores align or there is a small difference. The scoring difference is less than 25% of the scale (+ or -).

Ranking Open scale: 5-points scale (range 1 to 5) questions

Questions	Self	Managers	Peers	Direct Reports	Weighted average	Blind
1. Willing to describe projects and tasks and set parameters so employees know what is expected of them and why.		3.67	5.00	1.00	3.00
