Surveys I Question Types to use Surveys

There are three types of questions that you can opt to use in your Survey Questionnaire. These are:

1. Likert Scale

In this question type, you can choose to give participants 3, 5, or 7 response options. You will need to enter the response options for them to select from, e.g., Strongly Agree, Agree, Disagree, etc. Each response option/descriptor will have a numerical value assigned to it as per the following:

Answering Scale of 3:   -1,   0,   +1

Answering Scale of 5:   -2,   -1,   0,   +1,   +2

Answering Scale of 7:   -3,   -2,   -1,   0,   +1,   +2,   +3

In the example below, a response scale of 5 has been selected (participants will have five options to select from).

2. Open Scale

In this question type, you may opt to have between 1 and 10 possible responses.

You will need to enter the response options/descriptors you wish to use, e.g., Strongly Agree, Agree, Disagree, etc.

Each response option/descriptor will have a positive numerical value assigned to it, as per the following:

Answering Scale of 3:   1,   2,   3

Answering Scale of 4:   1,   2,   3,   4

Answering Scale of 5:   1,   2,   3,   4,   5   etc.
